

We are the new SOCIAL DEMOCRATS, USA- SOCIALIST PARTY of AMERICA

After the former leadership simply stopped functioning, some members of the SD,USA from across the country sought to revive the group. Many of us were members of the organization from time when it was called the Socialist Party, USA. We seek to represent the heritage of the Socialist Party back to the merger between the Social Democratic Party and the Kangaroo Faction of the Socialist Labor Party which, in 1901, formed the Socialist Party of America. Hence, we have added "Socialist Party" to the name of our organization. While we claim the heritage of the entire American social democratic movement with all its flaws, we have no time for the faction fights, past or present. There are too many pressing problems facing humanity!

We respect the heritage of the SD,USA that was tied to organized Labor and which supported human rights at home and abroad. However, we reject the lurch toward neo-conservatism and militarism of old SD. As we attempted to relaunch our organization many people who were never members of the old group joined us. We are now buoyed with new ideas on green technologies, environmental protection, and global initiatives to bring peace and end hunger and poverty. See the back of this page for an idea of our vision.

SOCIALISM for the RICH FREE ENTERPRISE for the REST of US?

During the current "economic meltdown" governments around the world have found the money to bailout banks that made bad loans. In many places this has led to threats upon the historic social welfare programs enacted by the Labor, Social Democratic, and Socialist Parties of these nations. In the USA, there are predictions by many that the incoming Obama administration will need to postpone or cancel many of its proposed initiatives to aid working families and national infrastructure in order to pay for the bailout.

The SD,USA--SPA will work with our domestic allies in trade unions, community, and civil rights groups, inside and outside the Democrat Party, as well as our foreign contacts in the democratic socialist and Labor movement around the world to put forward a "people first" agenda and see that discussion spread to the larger public discourse. Our major weapon will be the ballot in municipal elections as our members run for and hopefully win offices in their hometowns. We embrace the strategy that saw the SPA of the early 20th Century grow to be a major force in politics across The United States.
